What is Letsbet ?

LetsBet is a decentralized betting platform, allowing our players to bet on the right price of the hottest cryptocurrencies. **Twice a day - every 12 hours** - there are multiple jackpots to compete for.

Winner is whose price prediction is closest to the actual price at **8am** and **8pm UTC**.

Our bets are censorship resistant, automated and completely autonomous. Our betting site is based on the same technology that gave birth to **Bitcoin** and **Ethereum** - the mighty blockchain. **90%** of each jackpot goes to the winner the remaining **10%** flow in a **pot** that will be distributed among the existing **XBET holders** on a **monthly** basis.

Growing jackpots will attract more players, which drives the jackpot size up and consequently increases the price of the **XBET** token. Every **Jackpot** yields a **10% payout** for our **XBET** token holders

The dividend payments are processed a **monthly** basis. **Payments** will be made in **Ethereum (ETH)** and sent directly to the crypto wallets of our **XBET** token holders!

Product Features
